

The Paediatric Diabetes Program

What is the program all about?

The aim of the Paediatric Diabetes Program is to improve the health and well being of children with diabetes.

The program has been designed to improve the continuity of care of children and adolescents with diabetes by working in a team.

The team includes the Paediatrician, the Paediatric Clinic (Endocrinologist, Diabetes Educator and Dietitian) and your General Practitioner.

The Annual Review

This program is based around an annual review the child or adolescent has with their General Practitioner. The results of this review are forwarded to the Paediatrician.

The annual review with your GP does not take the place of your visit to the Paediatric clinic and you will still see your Paediatrician regularly.

The results of your review will be entered onto the Divisions database and a report is created with all the results. When you have been on the program for more than 1 year the report will include the results of all your previous GP reviews.

Paediatric Diabetes Program Consent Form

NEW ENGLAND DIVISION OF GENERAL PRACTICE Enrolment / Consent Form

YOUR CHILD/WARD'S DETAILS:

Surname: First name:

Street Address:

New England Division of General Practice (NEDGP) is working towards

- Maintaining and improving standards of general practice
- Bringing General Practitioners closer to the community
- Identifying the health care needs of the community within its boundaries and facilitating programs and services to meet those needs
- Providing educational and practical support for the optimal delivery of primary health care in the Division area
- Facilitating links between General Practitioners and other health care professionals throughout the Division
- Promoting research programs which focus on issues relating to rural General Practice
